High Quality ODM Car Fenders Part Mold

ABIS Mold was found in 1996 in Shezhen, adjacent to HK, China. and we moved to Long gang District in 2010.With the advanced facilities from Germany, Switzerland and Japan, and a highly experienced design and engineering team.Our molding press machine ranges from 40T to 650T, 300+ molds capacity each year, and 70 % are exported to Europe and North America.

In addition to our plastic mold and molding specialties, we also can

provide you the services such us die casting, stamping /punching, blowing mold, as well as the secondary process.

Product Description

Part Name	High Quality ODM Car Fenders Part Mold
Description	Plastic Injection Mould /Plastic Auto Mould
Country of Original	China (ShenZhen)
Current Export Markets	North America
Lead Time	30 Days

Key Specification

1. Plastic Injection Over Mould

2. Cold Runner Mould

3. Plastic Injection Connector Mould

4. 1*4 Cavity , Ultramid A3K PA66 Material

5. H13 Steel

6. Two - Plate Mould

7. DME Standard Accessories

8. Cycle Time 45s

9. Press 350 Tons

General Information

Item#	Item	Description
1	Mold standard	DME or HASCO
2	Mold Base	LKM,DME, HASCO, FUTABA
3	Cavity/Core Steel	H13,S-7,S136,SS420,NAK80,P20
4	Hot Runner:	MOULD MASTER, MASTER TIP, HUSKY, HASCO, DME, YUD INCOE, THERMOPLAY, SYNVENTIVE.
5	Hydraulic Cylinder	PARKER, TAIYO, STAUBLI, JUFAN
6	Mold Components	DME, Progressive, PCS, Punch, Royal, etc
7	Steel Treatment	Heat Treatment, Nitriding, Chrome Plating
8	Surface Finish:	SPI standard, VDI EDM, Texture, etc
9	Texture:	Mold-tech, Yick Sang, Ni Hong ,Tanazawa etc
10	Plastic Material	PP, PC, ABS, PE, HDPE, PET, POM, PMMA, PA(GF), PBT(GF PVC, PPS, PEI, PEEK, LCP, PSU
11	Design Software:	CAD,UG, Pro E, Solidworks
12	Value-added Service:	Dust-free Spraying, Silk-screen Printing, Ultrasonic Welding, Thermal Bonding, Assembling, Prototype
13	Export Country:	Europe, USA, Canada, Mexico, Brazil, Australia ,Middle-east , India etc
14	Our Capability:	Auto, Aerospace, Household, Electrical, Industrial, Medial, Toys Office, Cosmetic, Outdoor, OA Equipment etc

QC Control

Mold Making QC main steps

Mould Design Control : Design review checklist before submitting to the customer. We will not start the steel purchasing work until get your written approval on our mold drawing.

Incoming quality control: all steel material and outsourcing standard components will be checked to ensure that they are in accordance with the BOM(QTY and material/components name specified).

In process quality control: all the machining and assembling process is under control, we have QC team to check and supervise the tolerance and processed surface to satisfy the requirements. (Mould Steel Hardness Inspection, Mould Electrodes Inspection, Mould Core and Cavity Steel Dimension Inspection , Mould Pre-Assembly Inspection)

Final quality control: within 3 days the completion of the plastic mold, we will have a thorough check for the main size of the molded plastic sample and mold to ensure that the critical or full dimension (if required) are within tolerance.

Mould Pre-Shipment Final Inspection : Free-fumigation three-plywood case packing; make sure the mold is conformity to the approved mold drawing. The spare components and easily broken components and the electrode (if required) are packaged, as well as the mold drawing and some certificated.

Plastic Molding QC main steps

Vernier caliper measurement is performe
trained operators when the first product
our machine, we check the contour dimer
assembly status (if exist) to identify if any

The molded parts are then inspected agai
experienced QA department for the full d
especially the critical dimensions set by cu
quality result was recorded at the same ti
Result will be to our QC Supervisor directl
unqualified dimensions (if exist) are cause
uncontrolled factors or our mistakes and
the related actions to improve it.

We will trustily report the T1 result to cus
send T1 samples to customers for checkin
sometimes T1 samples need improvemen
samples are required by customer at first,
actions to improve the mold to make sure
have 0 defects. No shrinkage, warpage, fl
streak, air bubble, step line, ejector mark,
dimension within tolerance.

Package inspection: make sure QTY/color
and weight are correct.

Packaging & Delivery

Packaging Details: Free-Fumigation Three-Plywood case

Delivery Detail: 25-35 days by sea, 3-7 days by air

FAQ

Q: Can you do post production?

A:Some customers in addition to plastic injection require post proce ssing, assembly of their products and packaging.

Q:

Is it possible to know how are my products going on without visitin g your company?

A:We will offer a detailed production schedule and send weekly rep orts with digital pictures and videos which show the machining pro gress.

Q: If you make poor quality goods, will you refund our fund?

A: As a matter of fact, we won't take a chance to do poor quality products. Meanwhile, we manufacture goods quality products until your satisfaction.

Q: What is the software you will use to check the drawing?And what is format of drawing you can check?

A: Our designers and engineers all use VISI and UG to check 2D and 3D drawings.

We can check the drawing with PDF .AI, DWG ,STP or IGS formats.

Q:How can you confirm the plastic injection mold you produce is the one we need?

A: we can provide professional mold analysis reports before mold making.

Q:What can we do if we don't have the mold drawing ?

A: you will only provide the actual sample to us then we can help you to make the design injection mold drawings for your confirmation.
